Networking & Security: TCP/IP, IPv4/IPv6, subnetting/CIDR, DNS, DHCP, NAT, ICMP, Wi-Fi, WANs, VPN concepts, routing, ping, traceroute/tracert, nslookup, Test-NetConnection, SSH, TLS/SSL, UFW, Fail2ban, SPF, DKIM, DMARC, PTR/rDNS

CERTIFICATIONS & EDUCATION

Google IT Support Professional Certificate | Grow with Google / Coursera | In Progress
Completed: Technical Support Fundamentals; The Bits and Bytes of Computer Networking (Course Certificate earned September 2026).

- Networking coursework covered TCP/IP, DNS, DHCP, NAT, routing, WANs, wireless networking, cloud concepts, IPv6, and command-line troubleshooting tools.

Certificate of Completion - Computer Programming | Winter Park Tech (now Orange Technical College)

- GPA: 3.8 | Study included C++, C#, Visual Basic .NET, database access, object-oriented programming, and software development fundamentals.
- Occupational completion credentials: Junior Programmer and Computer Programming Specialist.

PROFESSIONAL EXPERIENCE

Manager | Farm City Inc. | Orlando, FL | Present

- Manage day-to-day retail operations, customer service, staff support, scheduling, vendor coordination, cash handling, and problem resolution in a family-owned business.
- Serve as the go-to technical resource for staff, troubleshooting hardware, software, connectivity, and business-system issues; research problems, test fixes, explain next steps, and involve vendors or higher-level support when appropriate.
- Built, deployed, and maintain the company website, including domain and DNS configuration, deployment, updates, maintenance, and troubleshooting.
- Train and support staff on business systems and workflows, translating technical issues into clear, practical guidance.

Trusted Editor Group Member (Volunteer) | GNOME Project / GNOME Foundation | Remote | Mar 2022 - Oct 2024

- Volunteer member of the GNOME Project Trusted Editor Group with permission to edit and maintain GNOME Wiki content; updated community documentation as needed.

SELECTED TECHNICAL PROJECTS

Active Directory & Endpoint Support Lab | Windows Server 2022, Windows 11 Enterprise, QEMU/KVM

- Built a Windows Server 2022 domain controller and domain-joined Windows 11 Enterprise workstation; practiced DNS, users/groups/OUs, permissions, Group Policy, AppLocker, PowerShell, and troubleshooting.

Self-Hosted Linux Infrastructure & Service Recovery | Ubuntu 24.04, Docker, Nginx, MariaDB, PHP-FPM

- Administer web, mail, and ticketing services on an Ubuntu VPS; manage backups, upgrades, TLS, firewall rules, system services, and troubleshooting. Migrated from Ubuntu 22.04 to 24.04 LTS and restored dependent services after the upgrade.

osTicket Help Desk & Support Portal | Ubuntu, Nginx, MariaDB, PHP-FPM | tickets.scottdiemer.com

- Deployed and maintain a live help desk portal; manage ticket workflows, backups, service configuration, upgrades, troubleshooting, and protections added after automated bot submissions.

Mail Server, DNS & DMARC Security | Mailcow, Docker, Postfix, Dovecot, DNS

- Manage a self-hosted mail environment with SPF, DKIM, DMARC at reject policy, and PTR/rDNS; verify legitimate mail flow and review DMARC aggregate reports for authentication failures and spoofing attempts.

Technical Portfolio & Web Deployment | Next.js, Nginx, SSH, Git, Bash | scottdiemer.com

- Built and deployed a Markdown-driven technical portfolio on a self-managed Linux server with Nginx reverse proxying, SSH access, Git authentication, and repeatable deployment workflows.
